Projects

Typing Competition

Tech: Next.js, React, MongoDB, Socket.io, Framer Motion, CSS

A real-time multiplayer typing challenge where users race live against each other. Built with Next.js and Socket.io for real-time communication, MongoDB for data storage, and Framer Motion for modern animations.

View Project →

UsePopCorn

Tech: React, JavaScript, APIs, CSS Modules, Responsive Design

A fun, interactive movie discovery app that fetches real movie data and allows users to rate and favorite movies. Built with custom hooks and modular components for scalability.

View Project →

Fast Pizza (Course Project)

Tech: React, JavaScript, HTML, CSS

A React-based pizza ordering app with real-time order tracking and dynamic cart management. Showcases advanced React state handling and reusable UI design.

View Project →

Bankist App

Tech: HTML, CSS, JavaScript (ES6), DOM Manipulation, Animations

A modern banking app clone simulating real transaction flows and dashboards. Designed to highlight interactive UI, animation effects, and responsive layouts.

View Project →

Workout Timer

Tech: HTML, CSS, JavaScript

A sleek workout timing app for tracking exercise and rest intervals. Focused on usability, clear visuals, and performance optimization.
